

SUMMIT VIEW SCHOOL

WHERE STUDENTS WITH LEARNING DIFFERENCES EXCEL

**JULY 9TH 2018 -
AUGUST 3RD 2018
8:30 AM - 1:00 PM**

VALLEY CAMPUS

**SUMMER PROGRAM
2018**

Small Group Tutorials

Test Preparation

Math, Reading, Writing Reinforcement

Enrichment Courses

Summit View offers comprehensive lower, middle, and upper school programs for students with learning differences. An innovative and integrated curriculum, coupled with small class size and low teacher to student ratio, enables students to develop their abilities and enhance their intrinsic talents.

The summer program offers students the opportunity to:

- acquire new skills
- reinforce basic reading, writing, and math skills
- master test-taking and improve study skills
- strengthen knowledge in a particular subject
- develop expertise in computers, the Internet, and multi-media

DAILY SCHEDULE

Period 1: 8:30-9:30

Lunch: 11:30-12:00

Period 2: 9:30-10:30

Period 4: 12:00-1:00

Period 3: 10:30-11:30

Valley Campus

6455 Coldwater Canyon Ave. Valley Glen, California 91606
(818) 623-6300

www.summitview.org

SMALL GROUP TUTORIALS (GRADES 1-12)

Daily tutorials in reading, writing, math, and study skills

- Individualized, intensive instruction provided by expert teachers
- Reading tutorials targeting decoding, reading comprehension, and reading in the content areas
- Math tutorials focusing on remediating gaps in scope and sequence, from basic math through geometry, and preparing students for advanced classes such as Algebra 2
- Writing tutorials concentrating on the writing process, paragraph structure, and essays
- Study skills instruction including active reading strategies in content areas, note-taking, and test preparation

1 hour per day for four weeks: \$1,230

2 hours per day for four weeks: \$2,260

3 hours per day for four weeks: \$3,240

ELEMENTARY (CURRENT GRADES 1-6)

PLEASE CHOOSE ONE OF THE FOLLOWING:

Intensive Reading Instruction

Students will receive intensive instruction in basic reading skills such as sight word recognition, phonetic strategies, syllabication, and fluency, using proven research based reading programs.

Summer Reading Project 2 Periods

Students will get a jump start on their summer reading project. This course is designed to help students read and analyze a text for their summer reading project. This course will have homework and students will need to continue working on their projects at the conclusion of summer school. (6th grade only)

PLEASE CHOOSE ONE MATH COURSE:

Math Exploration

This course will allow students to discover mathematical concepts by using brain teasers, games and activities. Students will have fun learning while discovering how math is used in daily life.

Middle School Math Prep

This specifically designed math class will help prepare students for 6th or 7th grade math. The focus will be on adding, subtracting, multiplying, and divided whole numbers, decimals, and fractions. (5th and 6th grade only)

PLUS, CHOOSE TWO OF THE FOLLOWING:

Technology Time

Using interactive web-based programs, this course is individualized to meet the needs of each student in the area of reading or math.

Physical Education

This course offers students the opportunity to enhance their gross-motor skills in a safe and positive environment.

Art and Illustration

Turn your drawings into fun, engaging images that communicate a mood, feeling or idea. Explore visual communication through short – and long – term projects; experiment with different ways of problem solving; and work in various media, everything from crayons to acrylics.

Engineering is Elementary

This class features activities based on the core concepts of the science curriculum. Students will work on problem-solving skills in this project-based course!

CLASSES SUBJECT TO ENROLLMENT

MIDDLE SCHOOL (CURRENT GRADES 7-8)

PLEASE CHOOSE FOUR COURSES:

Young Writers Workshop

Are you a young writer with lots and lots of ideas, but aren't quite sure how to get started? This writing class is designed to help young writers at any stage of the writing process to help outline, draft, and perfect their work. Students will learn how to use Inspiration to help organize their ideas.

Intensive Reading Intervention

Students will receive intensive instruction in basic reading skills such as sight word recognition, phonetic strategies, syllabication, fluency, and/or reading in the content areas using proven research based reading programs. Students will also utilize CLOSE reading strategy to gain meaning from the text.

Summer Reading Project 2 Periods

Students will get a jump start on their summer reading project. This course is designed to help students read and analyze a text for their summer reading project. This course will have homework and students will need to continue working on their projects at the conclusion of summer school.

Foundations of Math

This class will help young math students become confident in their ability to solve those often tricky and difficult fractions. Students will become more familiar and comfortable with fractions, decimals, and percents through the use of daily practice, activities, and skill challenges.

Preparing for Algebra

This course will help prepare students for Algebra I. It will consist of a review of basic mathematical skills and pre-algebra concepts. A preview of fundamental algebraic concepts will also be included.

Skills for Success with Tech Tools

This course teaches students how to learn effectively and how to apply what they have learned. Note-taking, outlining, test-taking, and reading for comprehension will be emphasized. Students will also learn how to use assistive technology tools to help them organize and manage their time. Emphasis will be placed on Google Docs, Inspiration, Read and Write for Google, and Microsoft Office.

Athletic Conditioning

Students will strengthen and enhance skills needed for basketball, volleyball, cross-country, general fitness and agility.

A-R-R-R-T: Learning to Reduce, Reuse and Recycle

Have you ever wondered what to do with all of the things in the back of your closet that you haven't touched in years? What about old magazines, plastic bottles and cans? In this course, students learn to look at what is usually unused and wasted as opportunity for self-expression. Integrated with the principles of sustainability, A-R-R-R-T aims to challenge students to think creatively about how to reduce, reuse and recycle while producing beautiful and useful works of art.

Spanish Enrichment: Hola, ¿Cómo estás?

Question marks in front of the question? Letters that wear hats? If you would like to learn about those things and more, join us this summer and discover the beautiful culture, language and cuisine of Spain and Latin America.

CLASSES SUBJECT TO ENROLLMENT

HIGH SCHOOL (CURRENT GRADES 9-11)

PLEASE CHOOSE FOUR COURSES:

Intensive Reading Intervention

Students will receive intensive instruction in basic reading skills such as sight word recognition, phonetic strategies, syllabication, fluency, and/or reading in the content areas using proven research based reading programs.

Enhancing Comprehension in Reading

In this class, students will read various types of literature including short stories, poems, editorials, biographies, magazine articles and essays. They will learn how to pick out relevant content, create a new vocabulary journal, discuss meaning in the reading, and formulate and answer questions to increase reading comprehension.

SAT Preparation

This course prepares students for the SAT. The language arts section builds proficiency in vocabulary, reading comprehension and essay writing. The math section will focus on algebra, geometry, and math reasoning while emphasizing test-taking strategies.

Math Counts

Master math skills through problem solving, number puzzles, word problems, and mathematical games! This course gives students a chance to strengthen math concepts by reinforcing and re-teaching critical skills required for success in their upcoming math courses.

Algebra Foundations

This course will help students strengthen their skills for Algebra success. Students will work on Algebra foundations such as graphing, solving for unknowns, and basic math concepts.

Spanish Enrichment: Hola, ¿Cómo estás?

Wish you would have practiced the language a little more? Want a better understanding of where or when you might actually use Spanish? Then join us this summer as we reinforce basics, while incorporating them into real life situations that infuse the culture, language and cuisine of Spain and Latin America.

HIGH SCHOOL (CURRENT GRADES 9-11) CONTINUED

Summer Reading Project 2 periods

Students will get a jump start on their summer reading project. This course is designed to help students read and analyze a text for their summer reading project. This course will have homework and students will need to continue working on their projects at the conclusion of summer school.

Athletic Conditioning

Students will strengthen and enhance skills needed for basketball, volleyball, cross-country, general fitness and agility.

Digital Graphic Arts: Photography & Photoshop

Have you ever wished you could Photoshop yourself into another picture? Ever looked at a magazine cover and thought how cool it would be to create one? Now you can by learning how to be a Graphic Designer. Find and take amazing photographs and learn how to use Photoshop to manipulate and enhance your images.

Preparing for Driver's Ed (Not a certified course)

Get a head-start on preparing for the written portion of the driver's permit exam. You will review the California Driver Handbook and learn tips on how to become a safe, responsible driver. Please note that this class is for information only. Students will need to take a certified Driver's ed course to meet the requirements for obtaining a provisional permit.

Under the Hood 2 Periods

This course offers students an introduction to basic automobile maintenance. Students will work on budgets and costs to own and maintain an automobile, in addition to gaining hands-on experience, such as learning how to change a tire, checking the oil, etc.
